

Healy 中草药(Materia Medica-42)

No	程序英文名	程序中文名	简单说明
1	Calendula	金盏花	利尿, 发汗, 兴奋, 缓下, 通经。又治肠痔下血不止。降血压
2	Calc Carb	碳酸钙	免疫系统功能过低致长期伤风感冒。极为焦虑, 易被惊吓。出生后就 有脊柱衰弱;永久性脊柱疼痛或脊椎侧弯。
3	Bryonia	泄根	泻药及利尿剂
4	Belladonna	颠茄	叶作镇痉及镇痛药;根治盗汗, 并有散瞳的效能
5	Arsen alb	砷	用于消化系统疾病, 食物中毒, 睡眠问题(失眠), 过敏, 焦虑症, 抑郁症和强迫症(OCD)
6	Arnica	山金车	治疗淤血, 扭伤, 肌肉痛及风湿痛。近来研究表明, 它还能刺激免疫系统。对癫痫病、创伤及晕船有效。
7	Argent nit	银色硝酸盐	用于烧灼伤口
8	Apis mel	西方蜜蜂	作用于细胞组织, 引起皮肤和粘膜浮肿。 蜜蜂刺痛的非常有特色的效果
9	Antim tart	酒石酸锑	通常用于治疗咳嗽, 咳嗽, 咳嗽, 呕吐, 剧烈恶心, 冷汗和嗜睡等。
10	Allium cepa	洋葱	是一种顺势疗法, 通常用于治疗感冒, 花粉症, 咳嗽, 头痛和声音嘶哑
11	Aconite	附子	在同性恋病中, 附子用于治疗恐惧, 焦虑和不安。急性突然发烧; 暴露于干燥, 寒冷或非常炎热的天气中的症状; 刺痛, 寒冷和麻木; 流行性感冒或充血感冒; 和沉重的脉动性头痛。
12	Lgnatia	伊格纳蒂亚	治疗悲伤和沮丧以及抑郁症
13	Hypericum	圣约翰草	有些人直接在皮肤上使用圣约翰草来治疗瘀伤, 扭伤和伤口, 或通过口吃以增强免疫力。在美国, 缓解抑郁症和焦虑症。
14	Hepar sulph	肝素	它可以缓解口腔出血, 并有效预防口腔和牙龈疼痛。它有助于减轻痛苦的颈部肿胀和灼热的瘙痒感。该药还可以治疗感冒, 咳嗽, 喉咙痛和淋巴结肿大
15	Gelsemium	胶草	用于治疗偏头痛和某些面神经引起的面部疼痛(三叉神经痛)。它也用于哮喘和其他呼吸问题
16	Ferrum phos	磷酸铁	可暂时缓解与发烧和炎症性疾病(如感染和肾炎)
17	Euphrasia	幼发拉虫	治疗可能与细菌感染有关的结膜炎和眼睑炎等眼疾。抗菌作用
18	Drosera	茅膏菜	治胃痛, 赤白痢, 小儿疳积, 跌打损伤。主赤白久痢。②下气。治跌打损伤。③止血、镇痛。
19	Cocculus	球藻	对于因焦虑, 忧虑和睡眠不足而疲倦, 对痛苦敏感, 对疼痛敏感的人有用
20	Cinchona	金鸡纳树皮	增进食欲。促进消化液的释放; 并治疗腹胀, 饱胀和其他胃病。它也用于血管疾病, 包括痔疮, 静脉曲张和腿抽筋
21	Chamomilla	德国洋甘菊	改善睡眠/增强记忆力/止咳祛痰/止痛功效/舒敏功效/去除黑眼圈
22	Carbo veg	碳素蔬菜	崩解和不完美的氧化是该疗法的主题(抗氧化)

No	程序英文名	程序中文名	简单说明
23	Cantharis	角叉虫	角鲨鱼可用于治疗以灼痛和强烈口渴为特征但无饮酒欲望的疾病。
24	Ledum	金丝桃属植物	它用于治疗动物和昆虫的刺伤（例如，指甲造成的刺伤）和咬伤。痛苦是粘着，流泪和颤动
25	Lachesis	南美洲的 Surukuku 蛇,	几种神经和循环系统疾病（排毒作用）
26	Potassium bich	重铬酸钾(细菌)	涉及大量，粘稠，顽强的粘液和气管分泌物的疾病。
27	Lpecac	吐根提取物	抗寄生虫，避孕作用催吐作用：抗病毒作用：抗癌作用
28	Sulphur	硫磺	刺痛的丘疹和水疱。而硫磺可以缓解头部的脉动，大脑的热量，颈动脉和心脏的搏动。
29	Staphisagria	葡萄球菌	金黄色葡萄球菌有助于缓解外科或干净伤口和疣的瘙痒或疼痛。
30	Silica	二氧化硅	可为身体的结缔组织（软骨，肌腱，皮肤，骨骼，牙齿，头发和血管）提供强度和柔韧性。二氧化硅是胶原蛋白
31	Sepia	乌贼墨	乌贼墨制剂临床上主要作为止血剂，治疗出血性疾病如：功能性子宫出血、胃出血等
32	Ruta	芸香	清热解毒，凉血散瘀，感冒发烧，风火牙病，头痛消肿
33	Rhus Tox	犀牛毒素	关节炎，风湿病，背痛，扭伤，流感
34	Pulsatilla	白头翁	清热凉血，解毒中草药
35	Phosphorus	磷	人体必需的矿物质
36	Passiflora co	西番果（西番莲）	治疗失眠，狂燥症，癫痫，镇痛，抗抑郁
37	Nux vom	马钱子	通络散结，消肿止痛
38	Sodium mur	钠，生命之盐，组织盐	皮肤和头发
39	Mixed pollens	混合花粉	治疗过敏
40	Merc sol	汞粉末	治疗梅毒，泻药，道家炼丹
41	Mag phos	细胞盐 氧化镁	痉挛，放射线疼痛，脚部抽筋，肌肉紧张酸痛，腹部绞痛，月经抽筋等
42	Lycopodium	石蒜	治疗皮肤糜烂

17	<p>Euphrasia (400)</p> <p>Euphrasia, or eyebright, is a genus of about 450 species of herbaceous flowering plants in the family Orobanchaceae, with a cosmopolitan distribution. They are semi-parasitic on grasses and other plants. The common name refers to the plant's use in treating eye infections.</p> <p>Eyebright, <i>Euphrasia rostkoviana</i> Hayne (Scrophulariaceae), is a medicinal plant traditionally used in Europe for the treatment of various health disorders, especially as eyewash to treat eye ailments such as conjunctivitis and blepharitis that can be associated with bacterial infections. Some <i>Euphrasia</i> species have been previously reported to contain essential oil. However, the composition and bioactivity of <i>E. rostkoviana</i> oil are unknown. Therefore, in this study, we investigated the chemical composition and antimicrobial activity of the eyebright essential oil against some organisms associated with eye infections: <i>Enterococcus faecalis</i>, <i>Escherichia coli</i>, <i>Klebsiella pneumoniae</i>, <i>Staphylococcus aureus</i>, <i>S. epidermidis</i>, <i>Pseudomonas aeruginosa</i>, and <i>Candida albicans</i>. GC-MS analysis revealed more than 70 constituents, with n-hexadecanoic acid (18.47%) as the main constituent followed by thymol (7.97%), myristic acid (4.71%), linalool (4.65%), and anethole (4.09%). The essential oil showed antimicrobial effect against all organisms tested with the exception of <i>P. aeruginosa</i>. The best activity was observed against all Gram-positive bacteria tested with the minimum inhibitory concentrations of 512 µg/mL. This is the first report on the chemical composition of <i>E. rostkoviana</i> essential oil and its antimicrobial activity.</p>	<p>幼发拉虫 (<i>Euphrasia</i>) 或小白蝇 (<i>Eebraska</i>) 是 Orobanchaceae 科中约 450 种草本开花植物的属, 具有世界性分布。它们在草和其他植物上是半寄生的。通用名称是指植物在治疗眼部感染中的用途。</p> <p>眼 b (<i>Euphrasia rostkoviana</i> Hayne) (玄参科) 是一种药用植物, 在欧洲传统上用于治疗各种健康疾病, 尤其是洗眼液, 以治疗可能与细菌感染有关的结膜炎和眼睑炎等眼疾。先前已经报道了一些 <i>Euphrasia</i> 物种含有精油。但是, 罗氏大肠杆菌油的组成和生物活性尚不清楚。因此, 在这项研究中, 我们研究了光亮精油对一些与眼部感染有关的生物的化学成分和抗菌活性: 粪肠球菌, 大肠埃希菌, 肺炎克雷伯菌, 金黄色葡萄球菌, 表皮葡萄球菌, 铜绿假单胞菌和白色念珠菌。GC-MS 分析显示有 70 多种成分, 其中正十六烷酸 (18.47%) 为主要成分, 其次为百里酚 (7.97%), 肉豆蔻酸 (4.71%), 芳樟醇 (4.65%) 和茴香脑 (4.09%)。该精油对除铜绿假单胞菌外的所有生物均显示出抗菌作用。对于所有测试的革兰氏阳性细菌, 观察到最佳活性, 最低抑菌浓度为 512µg/mL。这是关于罗氏大肠杆菌精油的化学成分及其抗菌活性的首次报道。</p>

This saying means that a disease can be cured by treating it with products that produce the same symptoms as the disease. These products</p>	<p>像金丝桃属植物一样，莱杜姆帕卢斯特 (Ledum Palustre) 也具有抗破伤风的特性。它用于治疗动物和昆虫的刺伤 (例如，指甲造成的刺伤) 和咬伤。痛苦是粘着，流泪和颤动 顺势疗法医学的原理是“像治愈一样”。这句话意味着可以通过使用产生与疾病相同症状的产品来治疗疾病。这些产品遵循另一种顺势疗法定律，即无穷大定律。与传统医学相反，无限法则指出，治疗剂量越低，效果越好。为了达到低剂量，将固化剂稀释很多</p>	

<p>follow another homeopathic law, the Law of Infinitesimals. In opposition to traditional medicine, the Law of Infinitesimals states that the lower a dose of curative, the more effective it is. To achieve a low dose, the curative is diluted many, many times until only a tiny amount, if any, remains in a huge amount of the diluting liquid.</p> <p>In homeopathic terminology, the effectiveness of remedies is proved by experimentation and reporting done by famous homeopathic practitioners. Ledum was proved as a remedy by the German founder of homeopathy , Dr. Samuel Hahnemann (1775–1843).</p> <p>In homeopathic medicine, ledum is used first and foremost as a first-aid remedy to prevent infection. It is taken internally for:</p> <p>bruises , especially bruises that are improved by the application of cold insect stings and animal bites puncture wounds , cuts, grazes, and scrapes black eyes and other eye injuries</p> <p>Other homeopathic uses for ledum include the treatment of stiff and painful joints, especially when the pain begins in the feet and ankles and moves upward. Ledum is also used for sprained ankles. According to some homeopathic practitioners, ledum is said to take away the craving for alcohol.</p> <p>Since 1995, ledum has been touted as a homeopathic</p>	<p>倍，直到在少量稀释液中仅保留极少量（如果有的话）。</p> <p>在顺势疗法术语中，补救措施的有效性是由著名顺势疗法医生进行的实验和报告证明的。Ledum 被德国顺势疗法创始人 Samuel Hahnemann 博士（1775-1843）证明是一种补救方法。</p> <p>在顺势疗法药物中，首先使用 ledum 作为预防感染的急救药物。它在内部用于：</p> <p>瘀伤，尤其是由于冷敷而改善的瘀伤 昆虫 st 伤和动物叮咬 刺伤伤口，割伤，擦伤和擦伤 黑眼睛和其他眼睛受伤 支气管的其他顺势疗法用途包括关节僵硬和疼痛的治疗，尤其是当疼痛开始于脚和脚踝并向上移动时。Ledum 还用于扭伤脚踝。据一些顺势疗法医生称，ledum 消除了对酒精的渴望。</p> <p>自 1995 年以来，ledum 被认为是莱姆病的顺势疗法。最初由康涅狄格州的一名综合性兽医开具的用于治疗马，狗和猫的莱姆病症状的方法，如今，一些替代从业者推荐以 1M 效价的镭作为人类莱姆病的治疗方法。关于它成功治疗这种痛苦疾病的报道有几篇。</p> <p>在顺势疗法医学中，某些症状在不同情况下会变好或恶化的事实被用作诊断工具，以表明哪种疗法将是最有效的。受益于 ledum 治疗的症状会随着温暖而加重，并且在夜间也会加重。症状随着感冒的应用而改善。</p> <p>顺势疗法还将某些人格类型归因于某些补救措施。传说中的领主</p>	
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

<p>remedy for Lyme disease . Originally prescribed by a holistic veterinarian in Connecticut to treat the symptoms of Lyme disease in horses, dogs, and cats, ledum in the 1M potency is now recommended by some alternative practitioners as a treatment for Lyme disease in humans. There are several anecdotal reports of its success in treating this painful disease.</p> <p>In homeopathic medicine the fact that certain symptoms get better or worse under different conditions is used as a diagnostic tool to indicate what remedy will be most effective. Symptoms that benefit from treatment with ledum get worse with warmth and are also worse at night. Symptoms improve with the application of cold.</p> <p>Homeopathy also ascribes certain personality types to certain remedies. The ledum personality is said to be discontented and self-pitying. People with the ledum personality may be irritable, angry, impatient, worried, and want to be left alone. People in need of ledum often have restless, disturbed sleep marked by bad dreams.</p> <p>Ledum is also used in Native American and Russian folk healing. In Russian, ledum is called bogulnik. Both these cultures use decoctions or infusions of ledum to treat coughs, bronchitis , and bronchial asthma . According to historical records, the famous Swedish botanist Karl Linneaus (1707–1778)</p>	<p>人格是不满和自负的。具有领导性格的人可能会易怒，生气，急躁，担心，并希望独自一人。有需要的人通常会因做恶梦而焦躁不安，睡眠不安。</p> <p>莱杜姆还用于美洲印第安人和俄罗斯人的民间康复。在俄语中，ledum 称为 bogulnik。两种文化都使用汤或水煎剂治疗咳嗽，支气管炎和支气管哮喘。根据历史记录，著名的瑞典植物学家卡尔·林尼乌斯（Karl Linneaus, 1707–1778 年）是第一个使用 ledum 治喉咙和咳嗽的人。</p> <p>此外，俄罗斯民间医学使用混合了雀巢和黄油的软膏制成药膏，该药膏可从外部用于治疗头皮屑，皮肤感染，瘀伤，伤口和出血。在外部使用，据信它可以作为抗生素和抗真菌剂来减少感染。</p> <p>主流医学研究人员已经在环境医学领域研究了 ledum。从 1990 年代中期开始的一些俄罗斯动物研究表明，ledum 提供了一些保护作用，以防止辐射对消化系统的损害和红细胞的形成。加拿大于 2002 年夏季完成的一项研究报告说，铅是高环境铅浓度的高度准确指标。</p> <p>莱杜姆作为蔬菜食用时的有益作用也正在研究中。伦敦大学药学院 2002 年的一份报告指出，镭具有很高的抗氧化活性，显示出有望作为痛风，与衰老有关的疾病和中枢神经系统疾病的治疗方法。</p>	
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

<p>was the first to record using ledum for sore throats and coughs.</p> <p>In addition, Russian folk medicine uses ledum mixed with butter to make an ointment that is applied externally to treat scabby dandruff , skin infections , bruises, wounds, and bleeding. Used externally, it is believed to act as an antibiotic and an anti-fungal to reduce infection.</p> <p>Mainstream medical researchers have studied ledum within the field of environmental medicine. Some Russian animal studies from the mid-1990s indicated that ledum offers some protection against radiation damage to the digestive system and the formation of red blood cells. A Canadian study completed in the summer of 2002 reported that ledum is a highly accurate indicator of high environmental concentrations of lead.</p> <p>Ledum is also being studied for its beneficial effects when eaten as a vegetable. A 2002 report from the School of Pharmacy at the University of London states that ledum has a high level of antioxidant activity, and shows promise as a treatment for gout , diseases related to aging , and central nervous system disorders.</p>
